

VENTUS MAKES MARKING EASY

Ventus Print & Apply System is designed and developed by KLINGER Finland. Due to the capability of real-time labelling the information as well as the product can easily be changed. Different attachment alternatives enable Ventus to label any product regardless of the industry your company is operating. Its modular structure gives an opportunity to customize your company a unique labelling solution with minimal costs.

In addition, its small and compact size makes it easy to install the system in different applications. Ventus fully combines the cost-effective price with reliability, endurance, flexibility and user-friendlness. Ventus even speaks your own language as well as standard English.

Key Features

- » Easy to adapt
- » Reliable
- » User-friendly
- » Settings can be easily modified
- » Can be connected to a network or WLAN
- » Robust metal frame

PRODUCT DESCRIPTION

Ventus Pallet is developed especially for pallet labelling. A turning application head enables labelling to two sides of the pallet. The basis for the design lies behind the standard issued for pallet labelling. However, the position of the application head can also be adjusted to apply the labels either horizontally or vertically. Ventus Pallet requires only one square meter of space to operate. The labelling speed of the system is six pallets per minute, when applying labels to both sides of the pallet.

APPLICATION POSITIONS

Ventus Pallet can apply a label on one or two sides of a pallet.

Technical Specifications	
Label size:	A5 (148 x 210 mm)
Speed:	Max 2 pallets/minute (labels to both sides of the pallet) Max 6 pallets/minute (labels to one side of the pallet)
Compressed air:	~ 6 bar
Printer options:	All major printer brands available both thermal and thermal transfer, such as Sato, Zebra and Datamax O'Neil (200, 300 and 600 dpi)
Dimensions:	Height: 600 mm Width: 500 mm Depth: 400 mm (without printer)

RECOMMENDED APPLICATIONS

We have delivered Ventus Print & Apply solutions to many different industries ie. food, chemistry, cosmetics, building materials and wood industries.
