### **FEATURES :**

- Easy Optical Alignment.
- A.G.C. ( Automatic Gain Control ) Circuit.
- High Grade Aspheric Lens.
- Rain, Dust & Insect Protection.
- Frost & Dew Protection.
- Adjustable Beam Interruption Period.

## FEATURES

### A.G.C. Circuit

The A.G.C. (Automatic Gain Control) Circuit continually monitors for gradual changes in the signal's strength caused by changing weather conditions. It adjusts the sensitivity accordingly to maintain the proper signal level for the current environmental conditions.

### Rain, Dust & Insect Protection

The rubber Ring and Rubber Grommets could prevent rain, dust and tiny insects from adversely affecting performance.

### Easy Optical Alignment

The rotating dial allows the installer to finely adjust the beam easily either horizontally or vertically.

### High Grade Aspheric Lens

The aspheric lens creates more sharply defined & precise infrared beams for poor weather conditions.

### Easy Installation

The pole mount brackets supplied will allow installation of two units on a pole at the same height easily.

### Adjustable Beam Interruption Period

The beam interruption time can be adjusted to fit any application.
